

Biwi

QuickForm®

Does your timing expire and you wish to validate your project? Probably, will you have to give up your idea because you are running out of time? Not if we come to the rescue! Thanks to our new **QuickForm®** process, we will be capable to give you a prototype in **10 working days!**

Biwi developed a fast and economic process enabling you to make sure your project is technically doable. From your file or from our modeling we are able to develop a flexible mould, allowing to inject your model at low pressure thanks to materials in rigid or flexible phase.

- Color: opaque as per your request
- Overmoulding possible
- Flexible : 30-90 shore A
- 3D files available, STL format
- Rigid: transparent

These prototypes constructed according to our high definition process ($\pm 0,03\text{mm}$) will enable you to get an accurate overview of your final project. Indeed, everything from the matter, the hardness, the tolerances to the colour will be selected in order to stick to your project.

From these prototypes you will be able to start your advertising presentations or tests.

Do not hesitate to contact our commercial team for more information.
