

Biwi

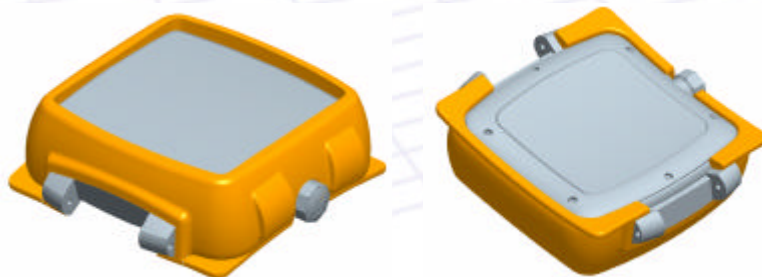

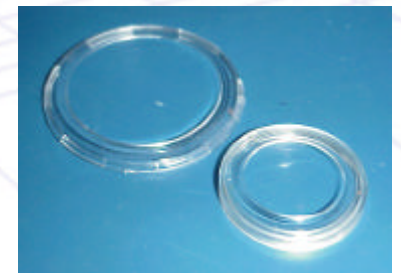

Protection

Protection for cases - lunettes

Our protections meet your expectations and solve your problems. We propose protections in rigid or flexible materials which will cover your watches and subsets during the different stages of the production until the sale of your product.

- You know the difficulties and problems of scratches and spots on your watch products.
- You wish to protect your cases and lunettes while maintaining the functionality of the watch.
- You are looking for an economic solution with a reusable product.
- Here is your solution...

Materials

- Specific materials adapted for applications of frictions without scratch.
- Transparent plastics.
- Thermoplastic elastomers if you are looking for its flexibility and its behaviour while sparing your budget.

Do not hesitate to contact our commercial team for more information or to consult our Internet site.
